This is the homepage for the visitors or users. There is an automatic clock and date that changes for the reason that it will be much easier for the user. He or she will just input his ID and will choose on the dropdown for time-in or time-out.

This is the first page for the admin. The admin will input the username "admin" and password "password" in order to proceed to the homepage.

This is the homepage for the admin. There are 3 buttons. Add User, View Users and View Visitors.
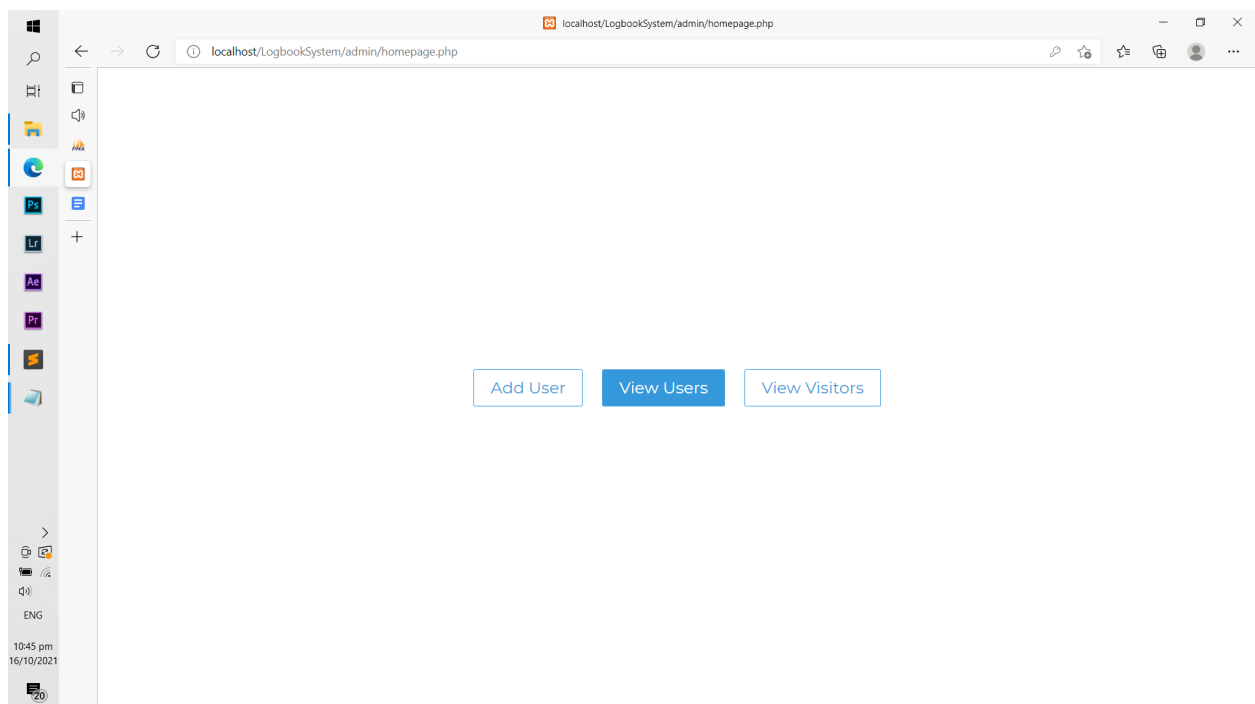

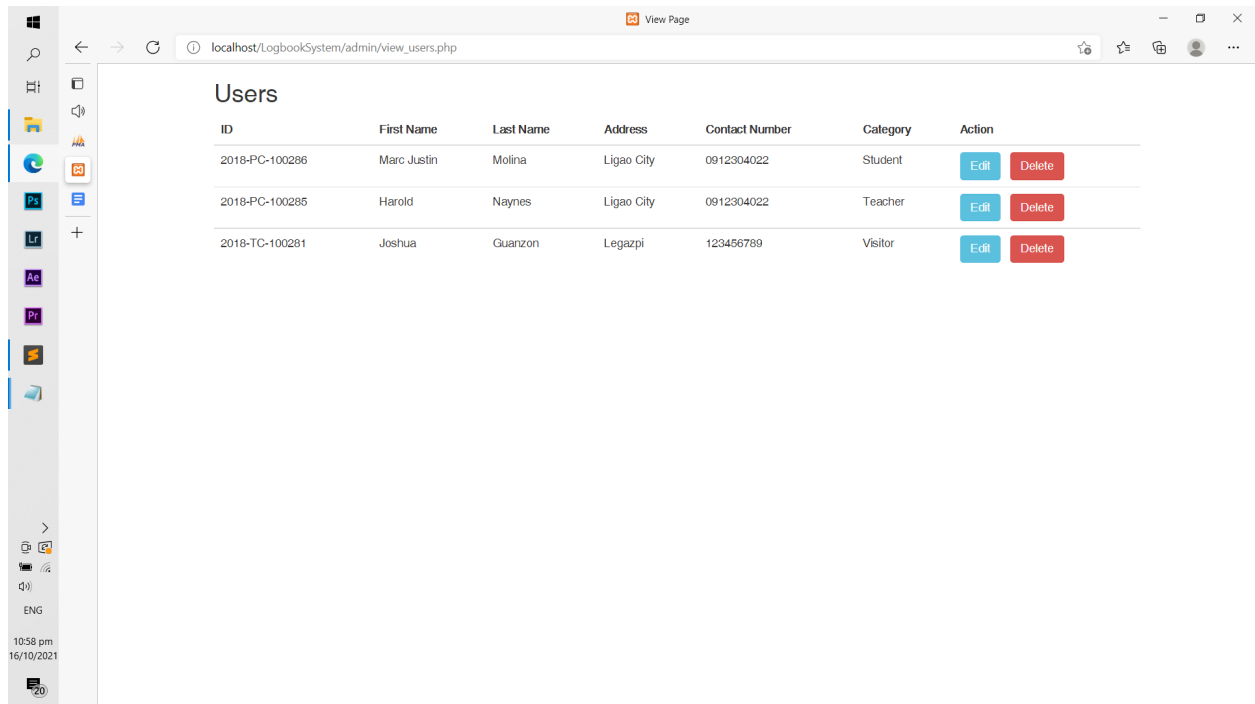

This is the registration form for the user or visitor. The admin will input the information needed.
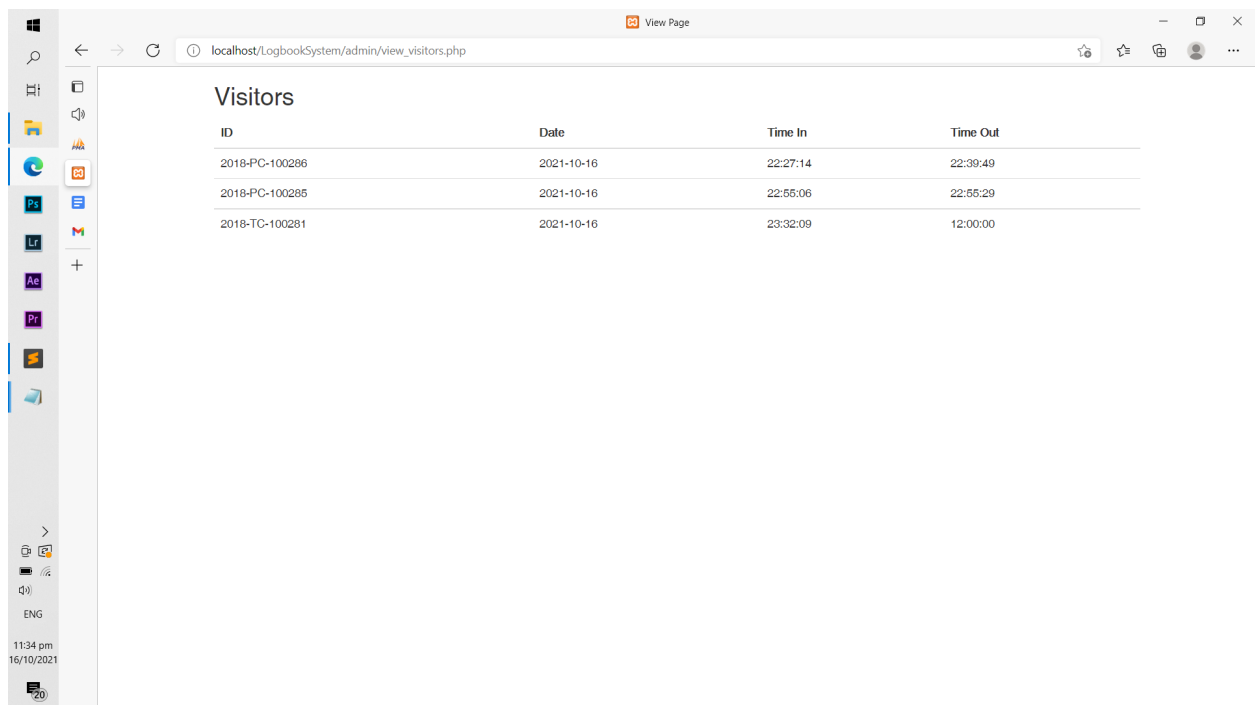

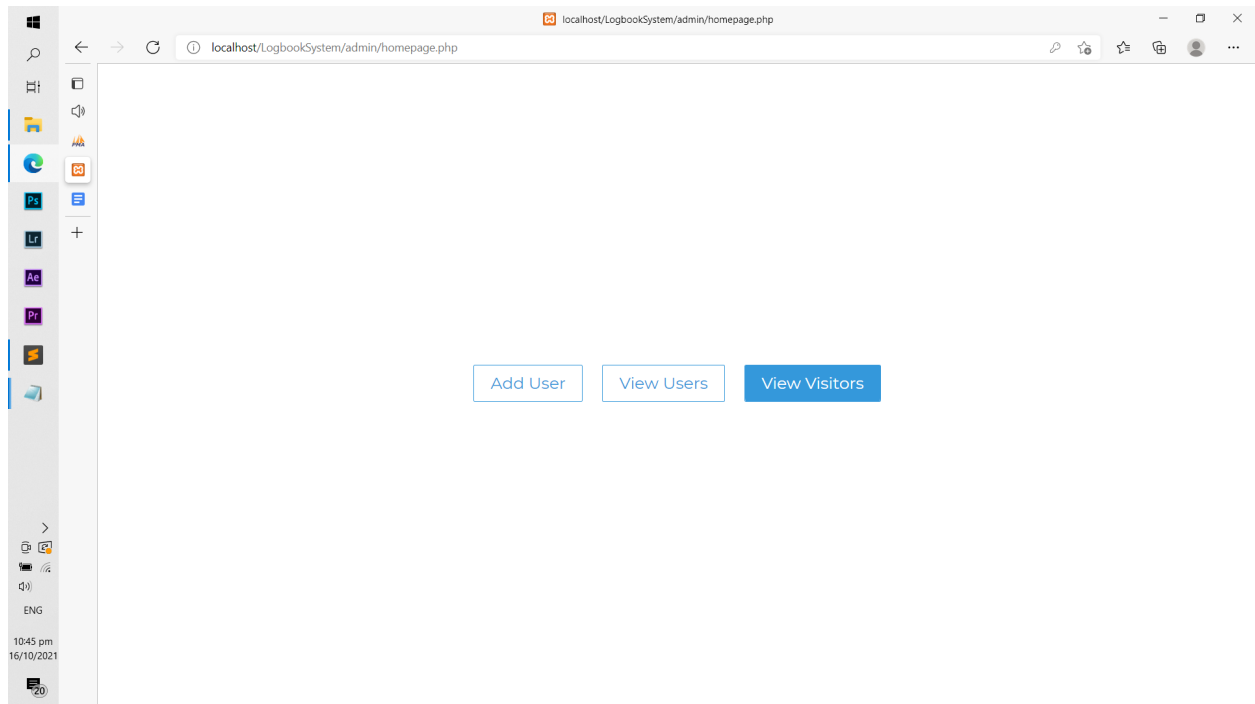

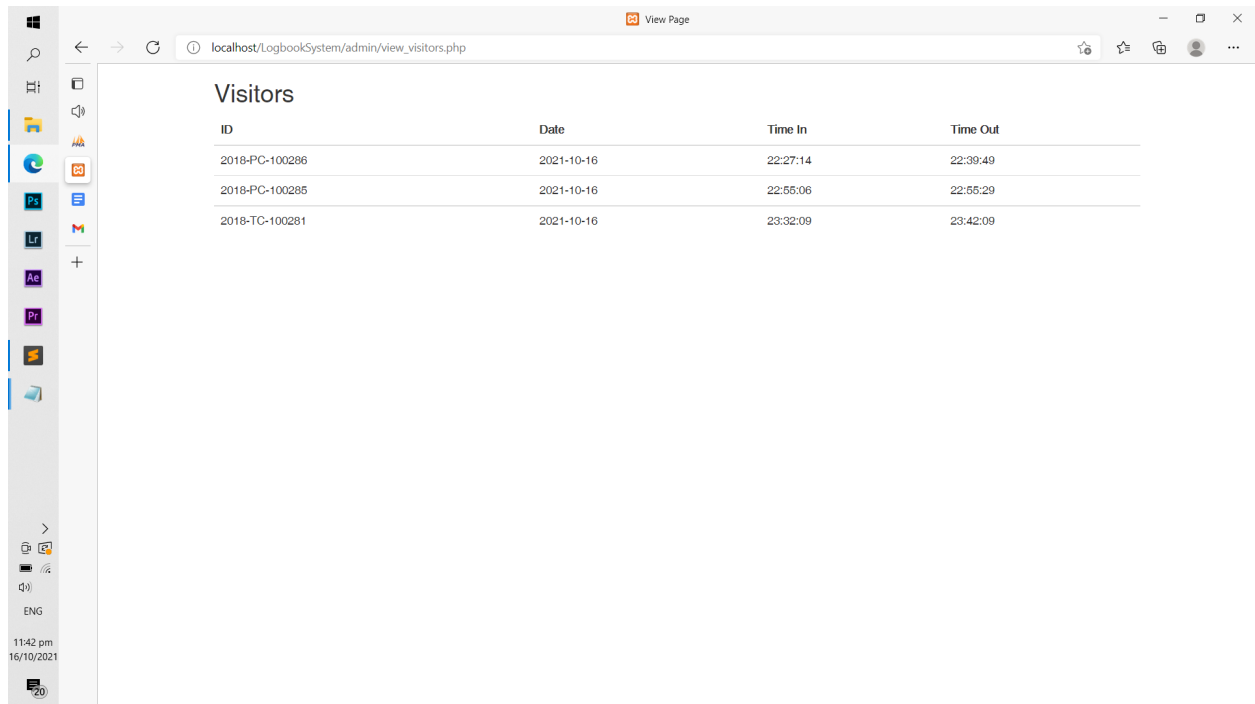

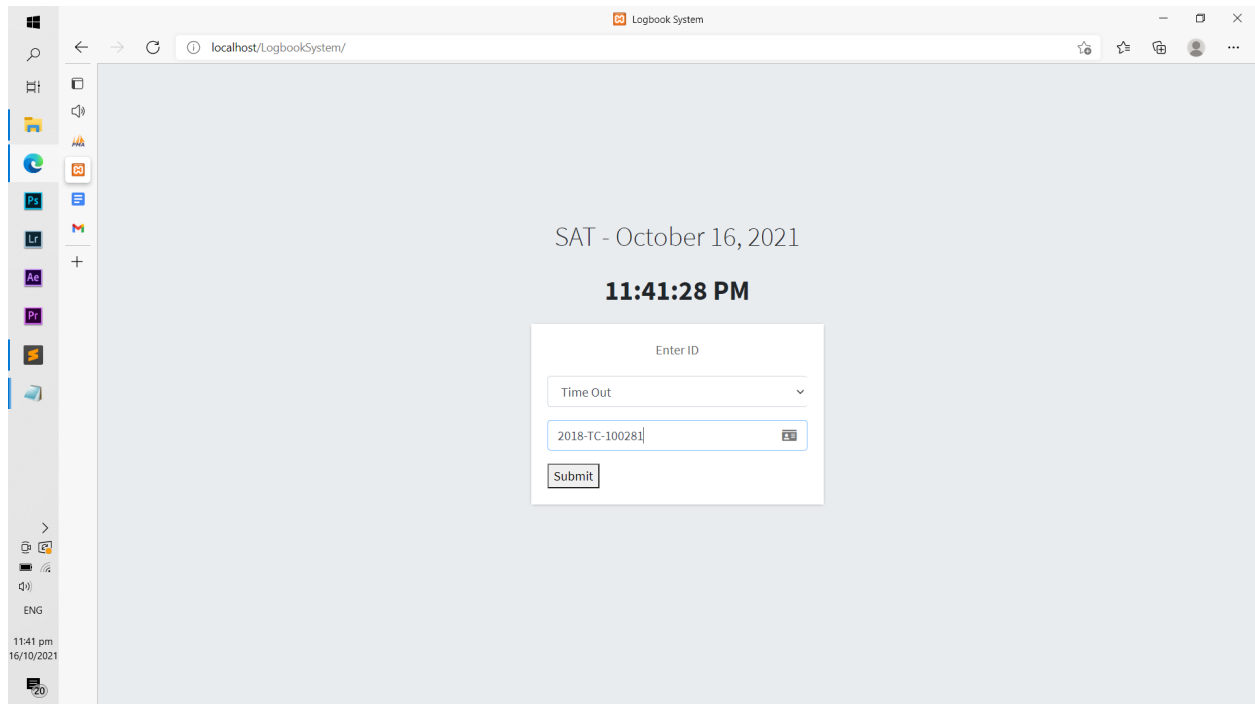

The admin can view the users who are registered in the system. The admin can also edit and delete the user.
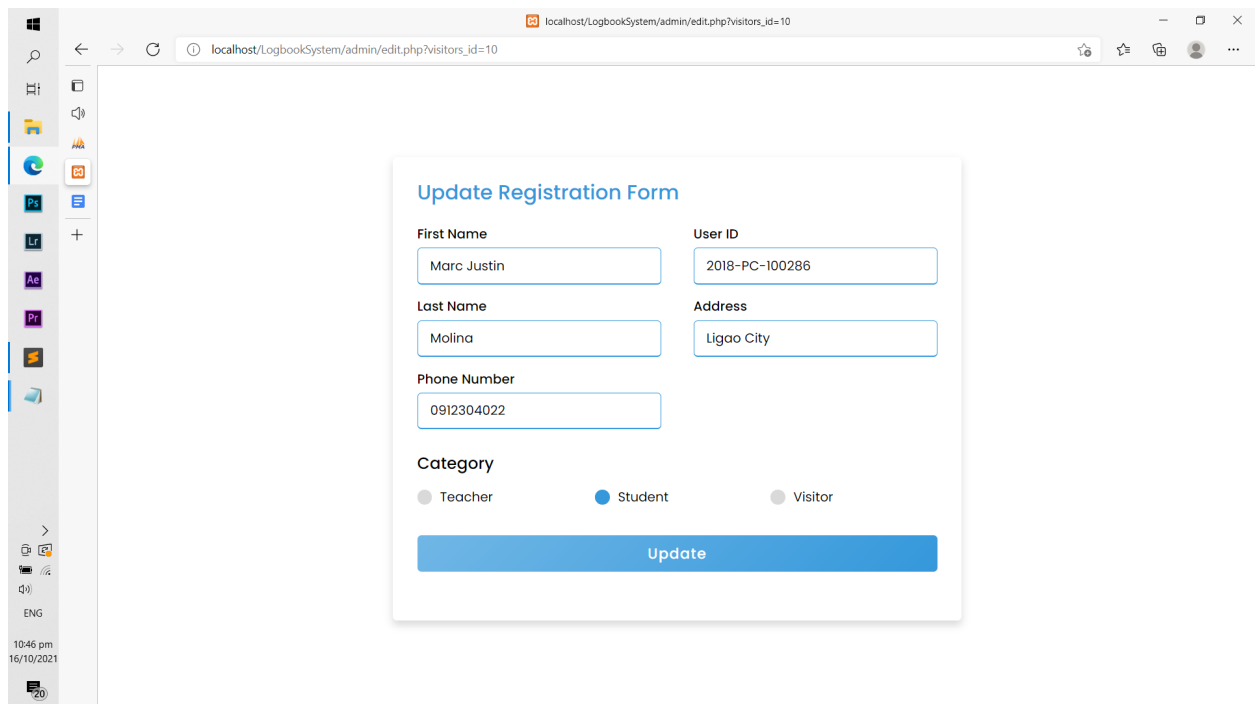

This is the update registration form where the admin might change if needed.

These are the people who visited or the people who used the system. As you can see for the last visitor the time out is 12:00:00. For the reason that the user did not yet timed-out in the system.

Once the user has timed-out in the system, it will automatically update.
